Education

2016 - 2020

Bachelor of Education, Information and Communication Technology

The Education University of
Hong Kong

Expertise

- Software architecture
- Agile and Scrum
- Waterfall Methodology
- solidity/rust/hardhat
- React.js/Express.js/Typescript
- Finance

Language

English

Chinese

Experience

2021-2023

DeFiTankLand

Lead Blockchain Developer/CTO

- Joined DeFiTankLand, a blockchain-based MMO tank game with NFT integration and battle royale gameplay.
- Led game mechanics design, economic modeling, and software architecture.
- Developed blockchain connections and created smart contracts.
- Oversaw Unity developers, web team, and artists, ensuring project milestones were met.
- Transitioned the game from idea to beta, integrated a balanced in-game economy, and differentiated DeFiTankLand in the MMO space with unique blockchain features.

2020-2021

Sapian Group

Blockchain and Full Stack Developer

- Sapian Group developed a blockchain-based remittance service for transparent and efficient cross-border transactions.
- Designed and launched a new blockchain using Proof of Work.
- Developed key tools including a digital wallet and a blockchain explorer.
- Worked collaboratively with a team of developers.
- Used agile methods for task prioritization and timely project completion.
- Successfully deployed the blockchain with high transaction speed.

SUMMARY OF QUALIFICATIONS

- **Blockchain Expertise** : 4 years of practical experience in blockchain development, focusing on economic modeling and seamless product implementation.
- **Technical Proficiency** : Highly skilled in Solidity, utilizing it for crafting smart contracts. Proficient in Node.js and React, enabling robust backend and user-friendly frontend experiences.
- **DeFi Mastery** : Possess an in-depth grasp of decentralized finance (DeFi) concepts, protocols, and platforms.
- **Gaming Industry Insight** : A comprehensive understanding of the gaming industry, encompassing game mechanics design and motivation strategies. Able to bridge the gap between blockchain technology and engaging gaming experiences
